Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Copies of the documents listed in the information disclosure statement (paper 3) were not available at the time of examination. However, US and Foreign patent documents were obtained from the PTO database. Non-patent literature documents that were available in the PTO library were considered. Applicant is requested to submit non-patent literature documents not initialed for consideration if necessary.

Specification

The disclosure is objected to because of the following informalities: The specification is either missing Example 2 or Example 3 has to be renumbered as Example 2.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 13, 14, 15 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 13(b) recites, "processing the substituted carbohydrate". Without the recitation of the process steps it is not clear what processing means.

In Claim 14 it is not clear what quenching means.

Art Unit: 1623

In Claim 15 it is not clear what "dissolving at least one of the substituted carbohydrate" means. The recitation conveys the meaning that more than one substituted carbohydrate is present. Clarification is needed.

Claims that depend from rejected base claims which are indefinite are also rendered indefinite.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 3-8 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 of U.S. Patent No. 6352722 ('722). Although the conflicting claims are not identical, they are not patentably distinct from each other because Instant claim recites a composition comprising a substituted carbohydrate according to claims 1, 2 or 3 and a substance capable of being released from the composition with some specific carbohydrates listed in claims 3. Instant Claims 5-8 recite a composition according to instant claim 4 or 5 containing further limitations including the carbohydrate being in the form of a matrix with the substance incorporated, the composition comprising physiologically acceptable

Art Unit: 1623

glass forming substances and various delivery systems. These limitations are all seen in claims 1-6 of the '722 patent.

It would be obvious to one of ordinary skill in the art that the composition claimed in the '722 patent and the instant application are substantially overlapping. The composition of the instant invention must contain new and distinguishable measures over the '722 patent to be patentably distinct.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Chortyk by (WO 96/01832).

Chortyk discloses a disaccharide of instant formula 2 where R groups are acyl groups having six to twelve carbon atoms (see structure on page 6).

Conclusion

Claims 1, 3-8, 13, 14, 15 and 17 are rejected.

Claims 2, 9-12, 16, 18-20 are objected to since they are dependent on rejected base claims.
